

GAURISHANKER GAUR

B. Tech. Computer Science and Engineering
MAHARAJA AGRASEN INSTITUTE OF
TECHNOLOGY (MAIT)

OBJECTIVE

To work in a challenging environment where I can utilize my skills for growth of the company and get opportunity for continuous learning.

WORK EXPERIENCE

Senior Software Engineer [Sep, 2018 - current]
Wingify (VWO)

Some of the responsibilities include:

1. Working on Integration Platform as a layer for continuous integration of other platforms with VWO from scratch.
2. Worked in the pricing team (team of 2) on a common pricing platform from scratch.
3. Design and Develop internal framework for ease of Software Development.
4. Business dashboard creation and automation.
5. Configurator and settings generator using CDN.

Backend Product Developer [Aug, 17 - Sep, 18]
Indycium Technologies LLP.

Some of the responsibilities include:

1. Major contribution in building the backend to automate logging of advertisements.
2. Moving system from legacy to microservice architecture.
3. Major contribution in removing dependencies of media files so as to scale the system.
4. Mentoring Interns (difficult given how small the team is, and thus, the bandwidth crunch.)

Software Engineer [Aug, 2016 – July, 2017]
DawnBit Technologies LLP.

Some of the responsibilities include:

1. Developing ERP software for universities and individual SCM modules.
2. Design and Develop lead generation tool by scraping social media.
